

# Heavy duty with pivoting hook - forend 25 mm, + C603XX.22.22 cylinder

UNI 9171

### Description

Embedded lock with fixed claw hook and anti-lifting pin, with cylinder art. C603XX.22.22 and cylinder fastening screw. The hook, made of forged steel, is actuated by the cylinder and the handle. The case and internal components are made of tropicalised steel. 25 mm forend with square ends. Single 60 mm backset.

### Application

Lock for heavy-duty exterior sliding doors and gates made of metal section.

### Mounting

Prepare recess in the section according to the dimensions shown in the diagram and weld the forend to the section. There is no striker for this type of lock: the hook latches directly onto the jamb.

**NB.** Each box contains a lock, a cylinder art. C603XX.22.22 and a cylinder fastening screw.
