

Opera XT - Lock kit - 22 mm forend

Description

Mortice lock with magnetic movement, latch in plastic material and bolt with manual movement in sintered steel to be coupled with an XT magnetic striker and a standard cylinder from the AGB catalogue, which are not included in the kit. On the external sash, you have to use a fixed knob and the cylinder opening where latch and bolt come out or with electric striker. Antipanic function: turning down the handle, the bolt and the latch come into the lock.

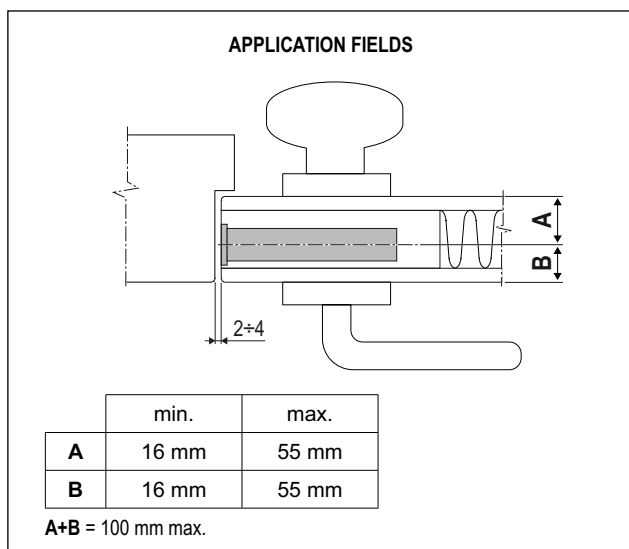

85 mm centre, 22 mm forend with round edge, 70 mm backset and through hub.

Use

For wooden doors and entrance doors. Suitable for interior doors of hotels with fixed knob or handle. When coupled with an electric striker, it is suitable for the use with an access control system. Suitable for use on flush doors or doors with rebate.

Installation

Mill and fasten with screws 4x25.
