

Scivola T oval - Kit C - pendant/button, 38-47 mm door thickness

Description

Lock kit with hook and brass flush plate with thumb turn, without keyhole. Notched locking cam on the outside for emergency opening. All the elements have been designed to eliminate any superfluous projections.

Use

For concealed, sliding timber doors on bathrooms or any room where the door is closed from one side only and does not require a key to lock it. Suitable for panels with a thickness of 38 to 47 mm.

Fastening

The plates are not secured by visible screws but snap onto striker plates. Follow the assembly instructions provided with the kit.

Note. All the kit components come in a single package.
